

Panoramic map for Loon Lake Mountain fire observatory

Circular panoramic view of Loon Lake Mountain fire observatory map. There are some unidentified handwritten notations on this map, possibly describing its features or numbering the elevation of the mountain. A panoramic map is a nonphotographical sketch of a piece of landscape that is not drawn to scale but puts the features of the land into perspective for the viewer. This image was created for the Forest Fire Service to view the mountain from its tip to its base and the fire observatory located on the mountain.
