

Figure 1. Comparison of the two models. The left model (Model 1) shows a virus entering a cell, where it releases its RNA. The RNA then replicates and produces proteins, which then assemble into new viruses. The right model (Model 2) shows a virus entering a cell, where it releases its RNA. The RNA then replicates and produces proteins, which then assemble into new viruses. The right model (Model 2) shows a virus entering a cell, where it releases its RNA. The RNA then replicates and produces proteins, which then assemble into new viruses.
