

Sawfly-damaged red pine, Croghan, Lewis County

Trees defoliated by pests—perhaps the redheaded pine sawfly or Leconte's pine sawfly. In the foreground are denuded trees; in the background are some much healthier-looking specimens. The image is somewhat dark, and much of the detail impossible to decipher. This image was created to record forestry and parks activities of the New York State Forest, Fish and Game Commission, Conservation Commission, or Conservation Department.
