RE: Women New York

On January 12th I had a meeting with Angela Cabrera, Melinda Bass and Ida Schmertz regarding the next issue of Women New York.

The following assignments were made and discussed at that time:

✓ Angela Cabrera - Minority women in Houston, Texas  
The article will outline what minority women did and how they did it in Houston.

✓ With information gathered by AS, the article will also include information regarding the involvement of disabled women.

✓ Ida Schmertz - Wrap-up on New York State Conference.  
This article is to be a straight forward piece that gives the facts, figures and some of the trials and tribulations. Because of past criticism of the conference it was felt that we should avoid, at all cost, pinning any laurels on the Women's Division.

Annette Samuels - Wrap-up on Houston, Texas.  
The article will give an overall view of Houston, the women from New York and the action.

Other:

✓ Mary Burke Nicholas - A statement on the plan of action for the future regarding the resolutions adopted in Houston as they relate to New York.

✓ Listing of the elected delegates and the delegates chosen by Washington. A note will accompany each listing explaining the differences and why.

Women New York

2-2-2

- ✓ Listing regarding where women can find the resolutions passed at New York Conference and how they can obtain copies of Houston resolutions.
- ✓ Also Melinda noted that there were T-shirts and posters still available from the Houston Conference and suggested that we might want to list how the women get these items.

Memorandum

STATE OF NEW YORK  
EXECUTIVE CHAMBER

TO: MBN

DATE: December 30, 1977

FROM: AS

The following is a tentative outline for the next issue of Women New York.

- Jda* 1. Wrap-up on the New York State Conference.  
This will include information regarding the number of women who attended and other highlights of the week-end.
2. Wrap-up on the Houston Conference.  
Same as above, with an update on the New York delegates meeting in early December.
- MBN* 3. I would also suggest a statement from you on the plan of action for the future regarding the resolutions adopted in Houston.
4. Possibly also there should be a piece on the minority women's resolution and the minority women's coalition.

Enclosed is MAB's memo regarding the resolutions adopted by the New York State Women's meeting, the minority resolution adopted in Houston, the complete resolution package from Houston, the list of women appointees (NYS) since June, 1977, and a list of NYS delegates to Houston.

John Marino is having prepared an additional list of women appointed to NYS board's since June 1977 which I should have by Tuesday, January 3, 1978.

Also, I requested a list from IWY in Washington of the names of the delegates-at-large they chose who attended the Houston conference. I should have that list early next week.

In addition, I have included the photographs taken at the NYS conference. There is a possibility that I can get photographs from IWY in Washington on Houston. I will be checking with them on Tuesday.

P.S.

As an aside, we might want to say something about the Governor's State of the State message if there is anything pertinent to women.

Houston

####

Ida 1- List Both elected delegates and the delegates chosen by Wash. Give the reasons for the choice by Wash.

Mailing list: Can we possibly get Pat Peters to work with us on the mailing list?

② Assignment to the secretaries - w/each one rotating a full day spent working with the permanent person working on the list.

## MINORITY WOMEN

Minority women share with all women the experience of sexism as a barrier to their full rights of citizenship. Every recommendation in this plan of action shall be understood as applying equally and fully to minority women

But institutionalized racism, language, culture and/or ethnic origin or governance of territory or localities have led to the additional oppression and exclusion of minority women and to the conditions of poverty from which they disproportionately suffer.

Therefore every level of government action should recognize and remedy this double-discrimination and ensure the right of each individual to self-determination. Legislation, the enforcement of existing laws and all levels of government action should be directed especially toward such problem areas as involuntary sterilization; monolingual education and services; high infant and maternal mortality rates; bias toward minority women's children; confinement to low level jobs; confinement to poor ghettoized housing; culturally biased educational, psychological and employment testing; failure to enforce affirmative action and special admission programs; combined sex and race bias in insurance; and failure to gather statistical data based on both sex and race so that the needs and conditions of minority women may be accurately understood.

Minority women also suffer from government failure to recognize and remedy problems of our racial and cultural groups. For instance: American Indian and Alaskan Native Women

## BLACK WOMEN

The President and Congress should provide for full quality education, including these special admission programs and for the full implementation and enforcement of all affirmative action programs at all levels of education.

The President and the Congress should immediately address the crisis of unemployment which impacts the Black community and results in Black teenage women having the highest rate of unemployment.

Congress should establish a national program for the placement of "children in need of parents", preferably in a family environment, where the status of said children is effected by reason of racial or ethnic origin.

The President and the Congress should assure federally assisted housing to meet the critical need of black women, especially of low and moderate income, should direct the vigorous enforcement of all fair housing laws, and provide the allocation of resources necessary to accomplish this housing goal.

The President, Congress and all Federal agencies should utilize fully in all deliberations and planning processes the Black Womens Plan of Action which clearly reflects and delineates other major concerns of Black Women.

## American Indian/Alaska Native Women

American Indian/Alaska Native women have a relationship to Earth Mother and the great Spirit as well as a heritage based on the sovereignty of Indian Peoples. The Federal government should guarantee tribal rights, tribal sovereignty, honor existing treaties and congressional acts, protect hunting, fishing, and whaling rights, protect trust status, and permanently remove the threat of termination.

Congress should extend the Indian Education Act of 1972, maintain base funding of education instead of replacing it with supplemental funding, provide adequate care through the Indian Health Service, forbid the systematic removal of children from their families and communities, and assure full participation in all federally-funded programs.

Asian/Pacific American Women are wrongly thought to be part of a "model minority" with few problems. This obscures our vulnerability due to language and culture barriers, sweatshop work conditions with high health hazards, the particular problems of wives of U.S. servicemen, lack of access to accreditation and licensing because of immigrant status, and to many federally-funded services.

#### HISPANIC WOMEN

1. Deportation of mothers of American born children must be stopped and legislation enacted for parents to remain with their children; citizenship provisions should be facilitated.
2. Legislation under the National Labor Relations Act should be enacted to provide migrant farm working women, federal minimum wage rate, collective bargaining rights, adequate housing, and bilingual/ bicultural social services delivery.
3. Classification of existing Hispanic American media as "foreign press" must be stopped to ensure equal access to major national events.
4. Additionally, the Federal Communications Commission must provide equal opportunity to Hispanic people for acquisition of media facilities (radio and television), for training and hiring in order to provide Spanish language programming to this major group.
5. Puerto Rican women emphasize that they are citizens of the United States and wish to be recognized and treated as equals.
